EDUCATION

Seoul National University, Seoul, Korea

Mar 2022 - Feb 2028

(expected)

B.S. in Rural Systems Engineering · Interdisciplinary B.S. in Artificial Intelligence (joint major)

GPA: **3.89 / 4.3** (as of Fall 2026)

RELEVANT COURSEWORK

AI / ML: Foundations of Machine Learning; Foundations of Deep Learning*

Computer Science: Computer Programming; Data Structures; Algorithms*

Mathematics: Engineering Mathematics I & II

* In progress, Fall 2026

PROJECTS

LabFinder - Career-Track-Based SNU Lab Recommendation System

Spring 2026

Course: Computer Programming, Seoul National University

- Built a CLI Java application recommending research labs by career track (Big Tech / industry / startup / PhD), applying the **Strategy Pattern** to encapsulate track-specific scoring logic.

- Designed multi-dimensional matching that normalizes and weights publications, overseas placement, career distribution, and time-to-graduation, with user-priority bonuses for papers, salary, work-life balance, and network.

- Implemented persistent student and lab profiles plus **recommend**, **search**, **compare**, **bookmark**, and profile-management commands across 35 SNU lab records.

Stack: Java, object-oriented design, Strategy Pattern, interface-based extension, file-based data persistence.

TECHNICAL SKILLS

Programming: Python, Java, C++

ML framework: PyTorch

Languages: Korean (native), English (proficient)

RESEARCH INTERESTS

Physical AI and embodied intelligence · Vision-language-action models · Attention-based architectures and extensions across modalities
